DICKINSON ADDS NEW MODEL TO ITS PROVEN LINE OF PUMP-ACTION HOME DEFENSE AND TACTICAL SHOTGUNS

New Dickinson XX3T-HS-2 Combines Overmolded Pistol Grip Design, Advanced Tactical Features

The new Dickinson XX3T-HS-2 12 GA. pump-action shotgun is everything users want in a tactical and home-defense gun — reliable, overbuilt and packed with specific features for its intended use.

With its 18-1/2" barrel and overmolded pistol grip, the XX3T-HS-2 is easy to maneuver and provides a firm grasp and superior control, even in wet weather or hot, sweaty environments. Ghost ring sights with hi-visibility protected front sights ensure accurate performance in even the most challenging conditions. For serious tactical users and situations, this shotgun also features a Picatinny rail on the top of the receiver, as well as under the forearm. This allows for easy mounting of lasers, tactical flashlights or other accessories.

The XX3T-HS-2 has a 5+1 capacity and comes with a range of important accessories, including a heatshield, muzzle break choke and standard hard carrying case for transportation and storage. Like all premium quality Dickinson shotguns, this new model is manufactured in Turkey's finest factories using a rare combination of modern CNC technologies and old-world craftsmanship.

To learn more about the new Dickinson XX3T-HS-2 pump-action 12 GA., or Dickinson's extensive line of premium quality shotguns for hunting, sport shooting, home defense or tactical use — visit your authorized Dickinson dealer or contact Dickinson Arms at (805) 978-8565.
